DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-24, drawn to a method for the manufacture of patterned microparticles.

Group II, claim(s) 25-29, drawn to a biologically modified patterned microparticle.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: patterned microparticles are known as taught by Fujimoto et al. (*Preparation of Unsymmetrical Microspheres at the Interfaces*. Langmuir **1999**, 15, 4630-4635)

Art Unit: 1709

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows for the invention of group I:

- a. Coating material
 - i. Inorganic nanoparticles
 - ii. Organic nanoparticles
- b. Means of facilitating coating material flow
 - i. Gravity
 - ii. Electric field
 - iii. Magnetic field
- c. Particle removal from membrane
 - i. Sonication
 - ii. Dissolution of membrane

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1709

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

For the species included in the invention of group I:

a. Coating material

- i. Claims 9
- ii. Claims 11

b. Means of facilitating coating material flow

- i. Claim 18
- ii. Claim 19
- iii. Claim 20

c. Particle removal from membrane

- i. Claim 23
- ii. Claim 24

The following claim(s) are generic: Claim 1 for groups a and c, and claim 17 for group b.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: for species a

Fujimoto et al. teaches the patterning of microspheres with the attachment of nanoparticles and species b and c both lack a common technical feature.

6. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
